The Library of Parliament hosts Canada's most complete collections of books and publications. The recently completed work on the Library, which began in 2002, was preceded by seven year of preparation. Every aspect of the Library building was in need of attention, from the weather vane atop the roof to the cramped and crowded basements below ground. And virtually every task required specialized expertise: as a heritage building more than 130 years old, the Library demanded a unique approach and rare skills.

La Bibliothèque du Parlement abrite l'une des collections les plus complètes de livres et de publications du Canada. Les travaux de rénovation de la Bibliothèque, qui avaient commencé en 2002 et qui ont été récemment achevés, ont été précédés par sept ans de préparations. À l'intérieur comme à l'extérieur, il fallait s'attarder à tous les aspects de la Bibliothèque, de la girouette sur le toit jusqu'aux sous-sols exigus et restreints. Pratiquement chaque tâche nécessitait des compétences spécialisées : comme il s'agissait d'un bâtiment patrimonial de plu de 130 ans, la Bibliothèque nécessitait une méthode unique et des compétences spécifiques rares.

The Dominion Public Building at 1713 Bedford Row, Halifax, constructed in 1935, originally served as a sorting station and administrative offices for Canada Post until 1990. With its distinctive domed tower, it was the first 'skyscraper' to be constructed in Halifax. In 1991, Public Works and Government Services Canada completed a major renovation to convert the Dominion Public Building to general purpose office space.

L'Immeuble Dominion Public situé au 1713, Bedford Row, à Halifax, a été construit en 1935. Il servait à l'origine de station de triage et de bureaux administratifs à Postes Canada et ce, jusqu'en 1990. Avec sa tour en dôme particulière, cet immeuble est le premier gratte-ci à être construit à Halifax. En 1991, Travaux publics et Services gouvernement Canada a entrepris des rénovations importantes pour transformer l'Immeuble Dominion Public en locaux à bureaux à usage général.

This is a limestone Government of Canada Building (GOCB) located at 294 King Street, in Kingston. It was constructed in 1859 and is "classified" as a heritage building by the Federal Heritage Board and Review Office. Known as the Customs House, this GOCB continues to be home to the Canada Customs and Review Agency.

Cet immeuble en calcaire est situé au 294, rue King, à Kingston. Construit en 1859, il a été désigné édifice du patrimoine par le Bureau d'examen des édifices fédéraux du patrimoine. Connu aussi sous le nom de maison de la douane, cet immeuble accueille encore aujourd'hui l'Agence des douanes et du revenu du Canada.

PWGSC recently completed renovations to this heritage site, the Louis St-Laurent building, which is located at 3 Passage du Chien d'Or in Quebec City. The exterior stone walls were restored.

TPSGC vient de terminer des travaux de rénovation à cet édifice du patrimoine, l'édifice Louis-St-Laurent situé au 3, rue Passage du Chien d'Or, à Québec. Les murs extérieurs en pierre ont fait l'objet d'une réfection.

In 1999 an $8.5 million metallizing project was completed at the St. Andrews Lock and Dam at Lockport, Manitoba. It involved the total removal of nearly 90 years worth of build-up of lead based paint, repairs to corroded steel sections of the bridge and the metallized coating of the structure using a zinc-aluminium alloy and a thermal spray process. It was the largest metallizing project ever carried out in North America, and the coating is expected to protect the steel for 50 years.

En 1999, un projet de métallisation de 8,5 M$ a pris fin à l'écluse et au barrage St. Andrews, à Lockport (Manitoba). Ce projet comprenait l'enlèvement complet des couches de peinture au plomb accumulées depuis près de 90 ans, la réparation des éléments d'acier corrodés du pont et la métallisation de la structure avec un alliage de zinc et d'aluminium et un procédé de projection thermique. Il s'agit du plus important projet de métallisation jamais réalisé en Amérique du Nord et il est prévu que la protection métallique protégera l'acier pendant 50 ans
